

## 1. PS808CT Spectrophotometer

- Designed for measuring the color of **tomato products, coffee, bread**, and other food applications.

## 2. YL3160 Non-contact Spectrophotometer

- Ideal for **production line** color measurement.
- Supports **USB, RS485, RS232, Ethernet, external trigger, and analog signal output** for easy system integration.

## 3. PS401 Spectrophotometer

- Equipped with a **1 mm measuring aperture**, suitable for measuring **small samples and tiny components**.

#### 4. New Cost-effective Series

- **Multi-angle spectrophotometers** for automotive coatings.
- **Transmission&Haze meters** for glass, film, and transparent materials.
- Better performance-to-price ratio to help you win more projects.
